APS CMOS technology:

- 18.5 μ m pixel size
- 5T pixel type
- Theoretical resolution is 27lp/mm

- **TWAIN driver**, which works compatible with the softwares of KODAK, SIRONA, SCHICK, etc.

Advanced FPS with CsI:Ti technology:

- Higher sensitivity plus higher resolution
- Best image quality with lowest X-ray dose

New Handydentist software:

- Easy to use
- Powerful image processing & preprocessing
- Net version for Multi-user solution
Easily connect to PACs system under DICOM 3.0 protocol.

Multi-user solution

- <HandyDentist> net version provides the Solution to multi-user and every user may share the information in database
- Plug and play connector allows the sensor to be moved from room to room.

The Effect of image process:

- Powerful image processing algorithms make it much easier to read the image information
